

Sulav Neupane

Web Developer

I am a web enthusiast with a decent knowledge in frontend and good foundation in server-side languages and frameworks. A logical problem solver and collaborative team player. Interested to contribute on impactful projects and expand my skills. Ready to deliver high-quality work in a dynamic environment.

PERSONAL PROJECTS

Discussion Platform API (07/2023)

- This is backend for a discussion platform (inspired from Quora and Reddit) where people can follow/unfollow others, can post and can interact via likes and comments. It is developed using NodeJs, Expressjs and MongoDB

E-Shop API (07/2023)

- This is a backend for a E-shop store built using Node.js, Express.js and MongoDB

JobsAPI (04/2023)

- This is the backend for a web app where a user will be able to make a list of the places where he/she had applied for a job, their current application status and also able to edit them if necessary

StoreAPI (03/2023)

- This is the backend for a furniture store made using NodeJS, ExpressJS and MongoDB

CV Generator (07/2022)

- This is a basic CV generator web based application made with vanilla JS where a person can fill up the form to automatically generate their CV.
